REACH Protocol for Emissions and Accident Scenarios in Supply  
and Distribution of Fuels and Petrochemical products

---

*SUB ACTION 2.2 Transportation and loading/unloading of dangerous  
petrochemical products (with different modes: road, rail, sea, pipelines):  
Identification of legislation and standards related to users requirements and the  
implementation of related regulations*

**SUB ACTION 2.2**

**Executive Summary of Legislation concerning Natural Gas  
Pipelines Networks in English (Chapter H)**

LIFE+ Environment Policy & Governance

## Executive summary

In this deliverable the legislation concerning the transport and distribution of Natural Gas is shortly described. Reference is made to the Transport Network (Exclusion Zone A and Zone B – Right of Way) based on Law 2289/1995 and to the construction, operation and maintenance regulations to which the Medium and Low Pressure distribution networks are subject to.

The contents of the Technical Regulation 'Natural Gas Transport Systems with maximum operation pressure above 16 bar' (Ministerial Decision Δ3/Α/οικ. 4303 ΠΕ 26510/2012) are presented. The Technical Regulation provides the minimum requirements concerning the design, construction, inspection and safety of Natural Gas Transport Systems maximum operation pressure above 16 bar, as well as the necessary supporting documents and technical documents for issuance of establishment and operations permits concerning these systems. In this deliverable, there are recorded : the purpose of the Technical Regulation, the field of application, the Natural Gas systems for which the Regulation is not applicable as well as some basic definitions according to the provisions of the Ministerial Decision Δ3/Α/οικ. 4303 ΠΕ 26510/2012.
